

Solution Requirements

[illegible]

Maximum Marks: 5 Marks

Functional Requirements

ID	Requirement	Priority
FR-01	Accept document type, parties, terms and effective date.	High
FR-02	Send validated input to the backend generation endpoint.	High
FR-03	Generate legal-document text using Gemini.	High
FR-04	Display the generated document in the web interface.	High
FR-05	Allow the user to edit the generated text.	High
FR-06	Download the document as TXT, DOCX and PDF.	High
FR-07	Provide /health endpoint for service availability.	Medium
FR-08	Show useful errors for missing configuration/API/backend failures.	Medium

Non-Functional Requirements

Usability: simple form-based UI. Reliability: backend exceptions are handled and surfaced as HTTP errors. Maintainability: functionality is separated into frontend, API, AI, formatting and utility modules. Security: API key is read from environment configuration rather than hard-coded in source.
