

Coding & Solution

Date: 30 September 2026 **Team ID:** SWTID-2026-8297 **Project Name:** LegalEase - AI-Powered Legal Document Generator

Maximum Marks: 5 Marks

Field	Details
Repository Link	To be added after GitHub repository creation.
Programming Language(s)	Python
Framework(s) Used	Streamlit, FastAPI
Key Features Implemented	Gemini generation, structured input, API endpoint, preview, editing, TXT/DOCX/PDF export, health check.
Pending / Incomplete Features	Production deployment, comprehensive automated test suite, advanced legal-domain validation and current Gemini model configuration may require updating.
Setup / Run Instructions	Create Python 3.12 virtual environment; install requirements; create .env from .env.example; add Gemini API key/model; run FastAPI with uvicorn and Streamlit with streamlit run frontend/app.py.

Code Quality Checklist

Criteria	Status
Modular and organized	Yes
Meaningful names	Yes
Comments/documentation where necessary	Yes
Error handling for critical operations	Yes
Application runs without critical errors	Yes, subject to valid API configuration
Version control repository	Pending / to be linked
